Yes, No

Do you have rain gutters? (circle one)
Yes, No

Do you have downspouts? (circle one)
Yes, No

Provide a brief description of your project*:

Site Plan Guidelines

Before submitting your project plans, confirm they meet ALL of the following criteria, if not they will not be accepted and you will be required to submit a new plan.

1. Zones: contain irrigation zones (also known as valves or stations) on my plans.
2. Irrigation: Clearly identify the new type of irrigation to be used (none, drip, bubbler, or point irrigation, no spray irrigation)
3. No Mixed Zones: Confirm that there were no mixed irrigation zones in my plans (e.g., a mixed zone has different types of irrigation in the same zone). Mixed zones do not qualify for this program! Inspector will verify that you do not have mixed zones at the post-inspection.
4. Accurate Measurement: Zones contain the approximate measurement of the turf to be removed. This measurement only includes living turf, and not dirt or other plants. Again, inspector will verify this!
5. Legend: Include a legend identifying the new plants, including ground cover (non-plant material).

Plant List Guidelines

Before submitting your plant lists, confirm they meet ALL of the following criteria, if not they will not be accepted and you will be required to submit a new plant list.

1. New Plant Names: Include the new plants used in your project (give separate lists for all areas in the project).
2. Quantities: List the quantity of each plant being used.
3. Spread: List the mature spread (width) for each type of plant on your list and verify this from one of the sources listed. Please do not make up the information. It takes a lot of time to check this on our end, and we will send it back to you to make it accurate.
4. Plant Coverage: Calculate that your project will meet the minimum 50% plant coverage requirement for the project with new plants, existing plants, or a combination. Include any existing plants on the list.
